

ASK MAGIC MIKE

Is live.
Is measurable.
Is still safely gated.

Editable evidence package • August 18, 2026

PUBLIC FUNNEL

VERIFIED LIVE

Canonical domains and health endpoints are reachable.

SYSTEM STATE

VERIFIED

0 genuine leads; 6 suppressed QA records; 0 live notification failures.

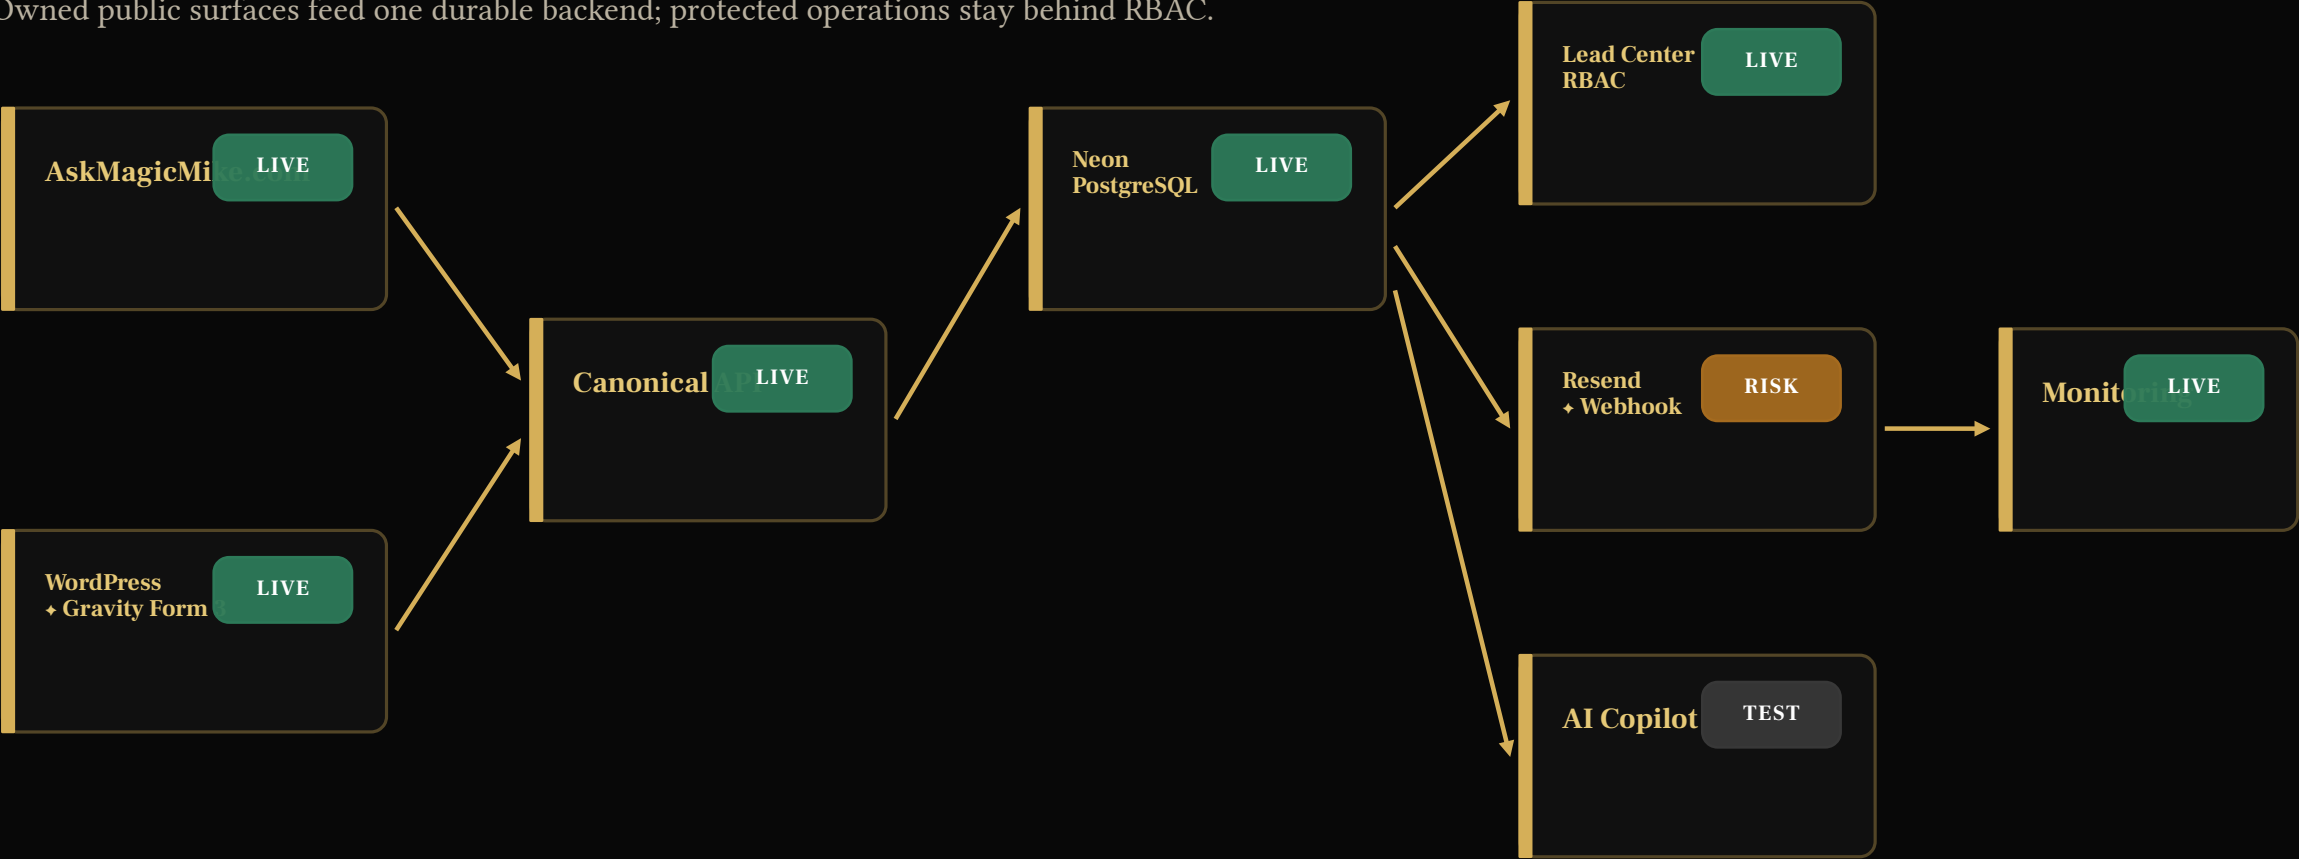

CONSUMER AUTOMATION

DISABLED

Email, SMS, sequences, and Mike activation remain off.

One canonical system

Owned public surfaces feed one durable backend; protected operations stay behind RBAC.

Live lead entry points

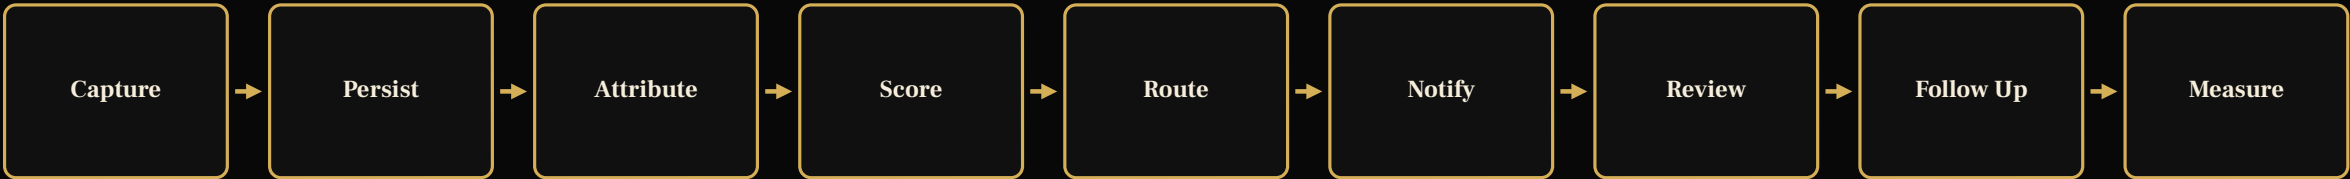

Live means reachable and wired—not proof of commercial volume.

Seller /sell LIVE	Buyer /buy LIVE	Value /value LIVE	Ask /ask LIVE
Widget /widget/v1 LIVE	Form 3 WordPress bridge LIVE	Forms 1/2/5/6/7 Forwarding held HELD	

Form 4 is recruiting-only and excluded from consumer lead sequences.

Lead journey

Every durable transition creates evidence; notification failure never deletes the lead.

DURABILITY

REQUIRED

Storage succeeds before outbound delivery.

EXPLAINABILITY

REQUIRED

Scoring and routing keep human-readable reasons.

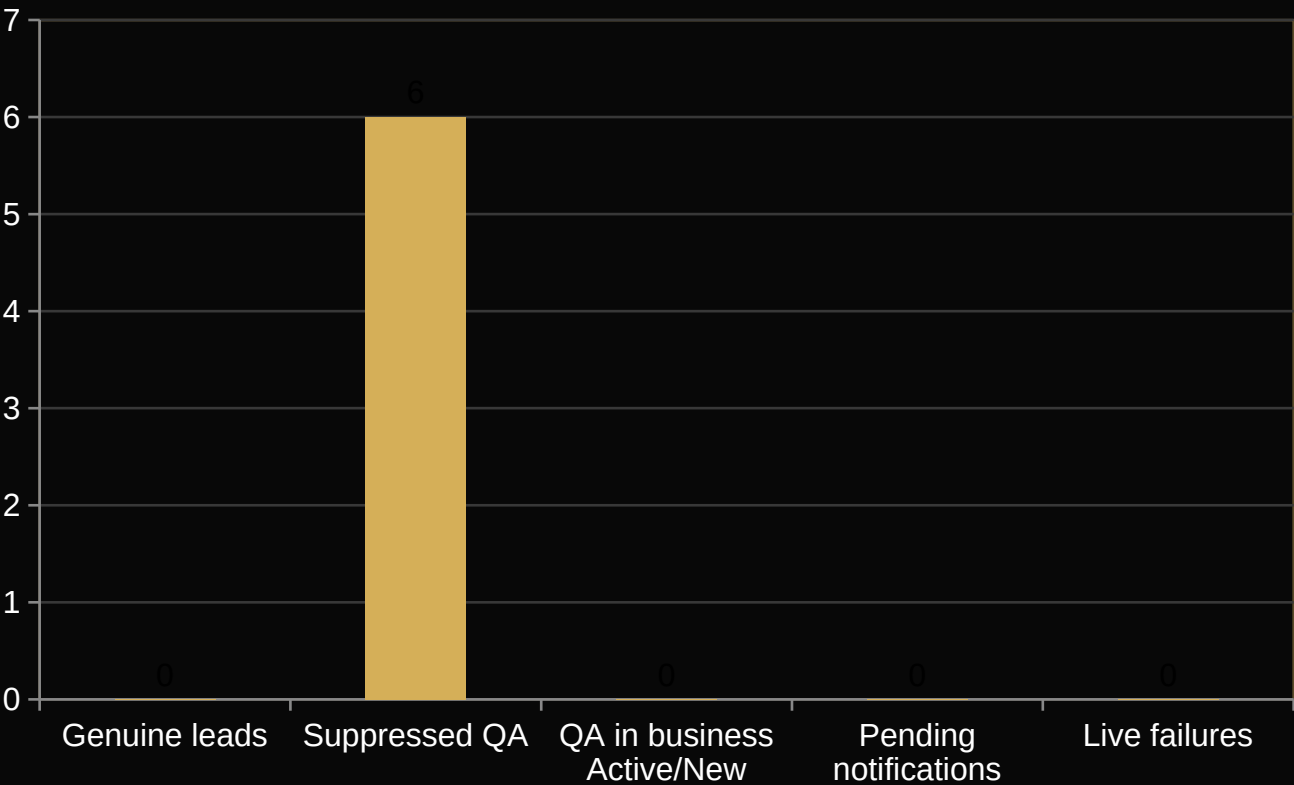

AUDITABILITY

REQUIRED

Events, retries, assignments, and exports are logged.

Current production state

A verified zero-state is better than a fabricated success story.

GENUINE LEADS

VERIFIED

AI Copilot acceptance

Useful advisory output is durable, measured, and unable to mutate lead or communication state.

MODE openai_responses VERIFIED TEST	MODEL gpt-5.6-luna RECORDED	TOKENS 1799 MEASURED	ACCEPTANCE COST \$0.006619 ONE TEST
--	--	---	--

No assignment, score, stage, task, appointment, notification, consent, or communication mutation.

Facts versus recommendations

The system records facts, applies deterministic rules, and labels AI advice before a human acts.

Communication permission

Each purpose is evaluated separately. Ambiguity fails closed.

Purpose	Channel	Required basis	Current state
Internal alert	Email / push	Operational assignment	ALLOWED BY CONFIG
Requested-service response	Email / phone	Consumer request evidence	APPROVAL REQUIRED
Marketing nurture	Email / SMS	Separate marketing permission	DISABLED
Property alerts	Email / SMS	Specific subscription	HELD
Carrier SMS	SMS	Consent + quiet hours + caps	DISABLED
QA testing	Approved inbox only	Test + suppressed + allowlist	VERIFIED TEST

Messaging release candidate

The mechanics are complete; consumer sending remains disabled.

ACCESS GATE

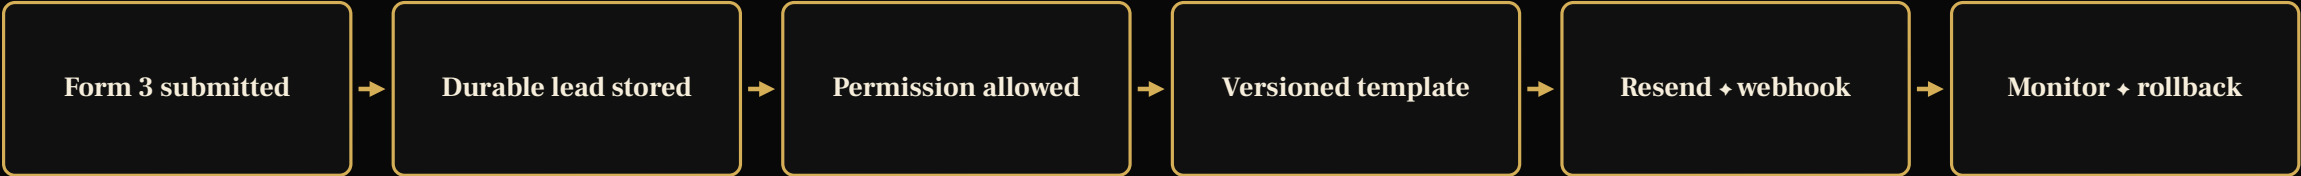

WordPress form status

All seven Gravity Forms are active in WordPress; only Form 3 is approved for canonical forwarding.

Form	Purpose	WP state	Canonical forwarding	Consumer messaging
1	Contact Us	Active	held	disabled
2	Cash Offer Form	Active	held	disabled
3	Home Value Form	Active	enabled	prepared_disabled
4	Join Our Team Form	Active	excluded_recruiting	excluded
5	Rental Property Search	Active	held	disabled
6	Short Term Home Rentals	Active	held	disabled
7	Never miss a property!	Active	shadow_not_allowlisted	disabled

Form 3 acknowledgment release gate

One form. One transactional purpose. One reversible flag.

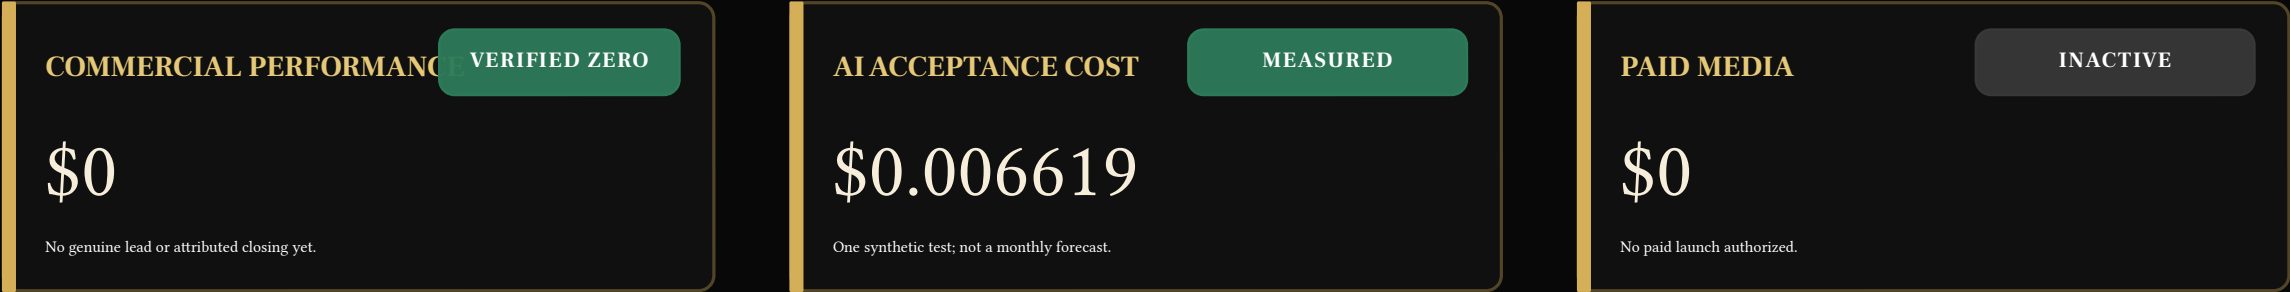

ELIGIBILITY Form 3 only Not test • not suppressed Transactional acknowledgment only APPROVAL REQUIRED	SAFETY Idempotency Bounce + complaint holds No nurture or SMS PREPARED	ROLLBACK Set consumer acknowledgment flag false. Lead storage and internal alerts continue. ONE FLAG

APPROVE FORM 3 CONSUMER ACKNOWLEDGMENT EMAIL PILOT

Economics and measurement

Current commercial performance is zero. Planning inputs remain editable and clearly labeled.

- Measure source → qualified lead → appointment → closing after the first genuine lead.
- Keep QA excluded from CPL, conversion, SLA, and revenue KPIs.
- Replace editable commission assumptions with verified brokerage economics before spend.
- Resolve provider account risk before promising reliable consumer delivery.

DECISION

Review the editable evidence and Brandon-only previews before authorizing any consumer automation.
