

ASK MAGIC MIKE

Day 1 Operations Report

Production control, queue integrity, and operator readiness

STATUS**LIVE / MONITORED****DATE****August 15, 2026****DATA****No genuine customer PII**

EXECUTIVE RESULT: The public funnel is reachable and monitored. The authenticated Active/New queue contains zero QA records. No genuine prospect has been fabricated or observed at this evidence point.

Verified production baseline

Control	Verified state	Evidence
Canonical commit	e754456cecaf6538df25bb4bf5eebe57e bf6each	Git/Vercel
Deployment	dpl_3ogimm1EhHCaPkEfXLAeojrm2H8 Z - Ready	Vercel
Database	Neon production branch br-round-base- auh6h2wd	Neon console
Public checks	Health passed; public monitor 9/9	HTTP + scheduled workflow
Lead state	0 genuine; 6 QA; all 6 suppressed	Privacy-safe aggregate
Active/New	0 QA; no STALLED or ROUTING READY QA	Signed-in Lead Center
Canonical forms	Form 3 only	WordPress bridge 1.1.0
Web Push	0 devices enrolled	Production aggregate

Operator state

- Brandon: administrator, email verified, credential present, authenticated access confirmed.
- Mike: primary lead owner provisioned; private password activation and physical Push permission remain pending.
- Carrier SMS remains disabled. Email is the primary live notification channel; Web Push is additive after device enrollment.

First genuine lead controls

Stage	Control	Escalation
Create	Persist before notification; explicit QA evidence required for test classification	Storage failure is critical
Assign	Mike or approved admin fallback with reason and audit event	Unassigned is high severity
Notify	One idempotent internal email; protected audit copy; bounded retry	Failed delivery remains visible
Respond	Consent-permitted human acknowledgment and outcome	Internal SLA monitor; no public promise
Report	Exclude test and suppressed records from live KPIs	Queue invariant failure is critical

Open human approvals

Owner	Action	Why human	Live funnel impact
Mike	Choose private Lead Center password, then enroll Push if desired	Private credential and physical browser permission	None; email funnel remains live
BIC/owner	Approve consent/routing packet before any held form activation	Brokerage/legal decision	None; Form 3 remains active
Hosting operator	Review only the Meta-blocking rule for two URLs	Managed WAF control	None; use AskMagicMike.com previews

Next operating action

ONE ACTION: Mike completes his private Lead Center password activation. No reset link or credential belongs in this report.
