

ASK MAGIC MIKE

Gravity Forms BIC Approval Packet

Controlled form preparation and one-form-at-a-time activation decisions

STATUS APPROVAL REQUIRED	DATE August 15, 2026	DATA No genuine customer PII
------------------------------------	--------------------------------	--

Prepared 2026-08-15. This packet requests business/legal approval; it does not represent legal advice. No held form is activated by this document.

Decision summary

Form	Purpose	Entries	Current state	Decision requested
1	General contact	1,337	Blocked; no explicit choice	Approve requested-response and separate optional-marketing wording
2	Seller options	27	Shadow; no verified placement	Approve purpose, placement, human-review language, consent, and Mike routing
5	Rental search	0	Shadow; no verified placement	Approve placement, territory, recipient, minimum data, and consent
6	Short-term rental inquiry	18	Blocked; no explicit choice	Approve requested-service consent, denied-consent handling, and Mike/admin routing
7	Property alerts	153	Deferred; marketing consent unclear	Approve explicit alert subscription, frequency, unsubscribe, and entry 1550 protection

Form 3 remains the only canonical form. Form 4 remains a separate recruiting workflow and is not proposed for consumer lead routing.

Proposed common consent structure

Requested response checkbox, unselected:

PROPOSED LANGUAGE: I agree that Our Town Properties, Inc. may contact me using the email or phone

PROPOSED LANGUAGE: information I provided to respond to this request. Consent is not a condition

PROPOSED LANGUAGE: of purchasing a property or service.

Optional future marketing checkbox, separate and unselected:

PROPOSED LANGUAGE: I would also like occasional real-estate updates by email. I can unsubscribe

PROPOSED LANGUAGE: at any time.

Exact wording, frequency disclosure, channels, retention, and legal sufficiency require the owner/BIC's approval before publication. An optional marketing choice must not be required for a requested transactional response.

Form 1 — Contact Us

- Placement: /contact-us/.
- Data: required name/email; optional phone, subject, message.
- Current controls: CAPTCHA, honeypot, active native Admin Notification.
- Mapping: general_question; source label OurTownProperties.com / Contact Us;

first/last touch, page, UTMs, click IDs, exact consent text/version.

- Routing: Mike until another recipient is approved.
- Duplicate plan: preserve native notification until one canonical QA delivery is proven, then disable only the exact duplicate.
- QA: one unmistakable suppressed QA entry; one Gravity entry; one signed forward; one Neon ID; no consumer message/SMS/audience inclusion; replay safe.
- Rollback: remove only Form 1 from allowlist, restore backed-up definition, preserve entries, re-enable only its prior notification if changed.

Form 2 — Seller Options

- Placement: not found in rendered sitemap; must be approved before exposure.
- Required copy: traditional listing and as-is discussion are options reviewed by a human. No guaranteed offer, highest-offer, automated binding valuation, response-time, closing-time, or outcome claim.

- Mapping: seller; property address, timeline, motivation, source/attribution, exact consent, and normalized contact fields.
- Routing: Mike.
- QA and rollback: same controlled one-form sequence; preserve all 27 entries.

Form 5 — Rental Search

- Placement: not found in rendered sitemap.
- Data: name, phone, email, current address, optional rental area. Confirm each field's minimum operational need before activation.
- Required decisions: public placement, Wilson/Eastern NC territory, approved operational recipient, lead type, and requested-response consent.
- Routing: Mike/admin review until a specialist is explicitly approved.
- QA and rollback: one-form sequence; preserve the current zero-entry baseline.

Form 6 — Short-Term Rentals

- Placement: /short-term-home-rentals/; 18 retained entries.
- Add an unselected requested-service choice and a separate optional-marketing choice. Denied marketing consent must still allow a requested response when otherwise permitted.
- Map as rental inquiry with source, attribution, exact consent, and free-text minimization. Route to Mike/admin review.
- Preserve native notification until canonical delivery is proven; then disable only the exact duplicate. Preserve all existing entries on rollback.

Form 7 — Property Alerts

- Placement: global/sitewide; 153 retained entries.
- Entry 1550 is protected as genuine, consent-restricted/unclear, WordPress only. Do not retroactively subscribe, forward, test, suppress, or delete it.
- Add an explicit unselected property-alert email subscription with approved frequency and unsubscribe method. Keep optional broader marketing separate.
- Denied consent: retain only the purpose-limited record allowed by policy; no alert subscription or audience inclusion.
- Routing: Mike/admin review until a recipient and automation purpose are approved.

- QA and rollback: controlled single test; preserve all entries and audience state; no retroactive import.

Approval requested

For each form, record: approved wording/version, approved public placement, approved recipient/territory, approved purpose/channels/frequency, whether the native notification may be disabled after acceptance, approver, date, and any conditions. Activation remains one form at a time with a backup and rollback.
