

ASK MAGIC MIKE

Mike Web Push Enrollment

Private credential activation followed by primary-device enrollment

STATUS	DATE	DATA
PRIVATE ACTION PENDING	August 15, 2026	No genuine customer PII

Technical state: ready. Device state: not enrolled. Mike must first finish his private Lead Center password activation.

Open <https://www.askmagicmike.com/admin/notifications/phone> while signed in as Mike. On iPhone/iPad, add the site to the Home Screen and open it there. Enter a non-sensitive device label, select the primary role, grant the browser's notification permission, and send one clearly labeled [TEST] push. Confirm the deep link requires the authenticated Lead Center, duplicate enrollment is idempotent, and revocation stops delivery.

Never store the Push endpoint or keys in a general artifact. Carrier SMS remains disabled and is not replaced by an unsafe phone takeover.
